

BAHIA PRINCIPE

HOTELS & RESORTS

OUR COMMITMENT:

BY 2020, BAHIA PRINCIPE HOTELS & RESORTS WILL BAN THE USE OF SINGLE USE PLASTICS AT ALL OF ITS ALL-INCLUSIVE PROPERTIES IN THE CARIBBEAN, MEXICO AND SPAIN.

#reduceplasticwaste

Bahia Principe has committed to substituting disposable plastic cups for reusable cups and plastic straws for biodegradable ones. These changes are now in effect at Bahia Principe's four properties in Riviera Maya, Mexico, and at a corporate level with all Grupo Piñero – the brand's parent company – offices initiating a plan to reduce plastic usage in January, with the goal of banning all plastics by the end of the year.

SOME MAJOR MILESTONES HIT DURING THE FIRST FOUR MONTHS OF THIS YEAR INCLUDE:

Reduced energy consumption per guest per stay by 8 percent.

Saved 40 percent more recyclable waste when compared to the same period in 2017.

Reduced water consumption per guest per stay by 2 percent.

Bahia Principe's guests also have the opportunity to take part in the brand's conservation efforts via the Eco-Bahia Foundation, a non-profit organization aimed at the environmental protection of the land where the brand operates. Through Eco-Bahia, guests can participate in programs such as sea turtle rescues and Maya jungle preservation.
